ArchForm Clinical Team 09/01/2021

Dear Doctor, thank you for contacting us, Archform customer service will be in touch with you via email for assistance. Thank you!

berlitzgarcia 08/25/2021

Hello, thank you. The modification is okay. I have concern about the diastemas between 22, 23 and 24. I do not see collision in contact points in that teeth.

ArchForm Clinical Team 08/24/2021

The modification for the patient is ready for your review and approval. File name is PatientMod1. Adjustments have been made as per your request. Thank you.

berlitzgarcia 08/23/2021

Thank you for your reply and design. I have two things to ask you. Would you please give more torque to tooth # 22? So it will go a little bit bucal. Also, can you verticalize tooth # 10, it seems to be inclined to mesial. I attached some images to show you some views that can help you Thank you

ArchForm Clinical Team 08/20/2021

The set up for the patient is ready for your review and approval. Both arches were aligned by closing spaces and tightening the contacts. * Please be aware that the IPR numbers indicating 0.1 should not be performed, these represent areas in which the software required tightening of the contact points to avoid spaces to open clinically. Thank you.

berlitzgarcia 08/19/2021

I will be waiting for your answer. Thank you

Prescription and structured intake

Prescription and intake surfaces capture the clinical plan in a structured format so manufacturing and review teams can operate from the same source of truth.

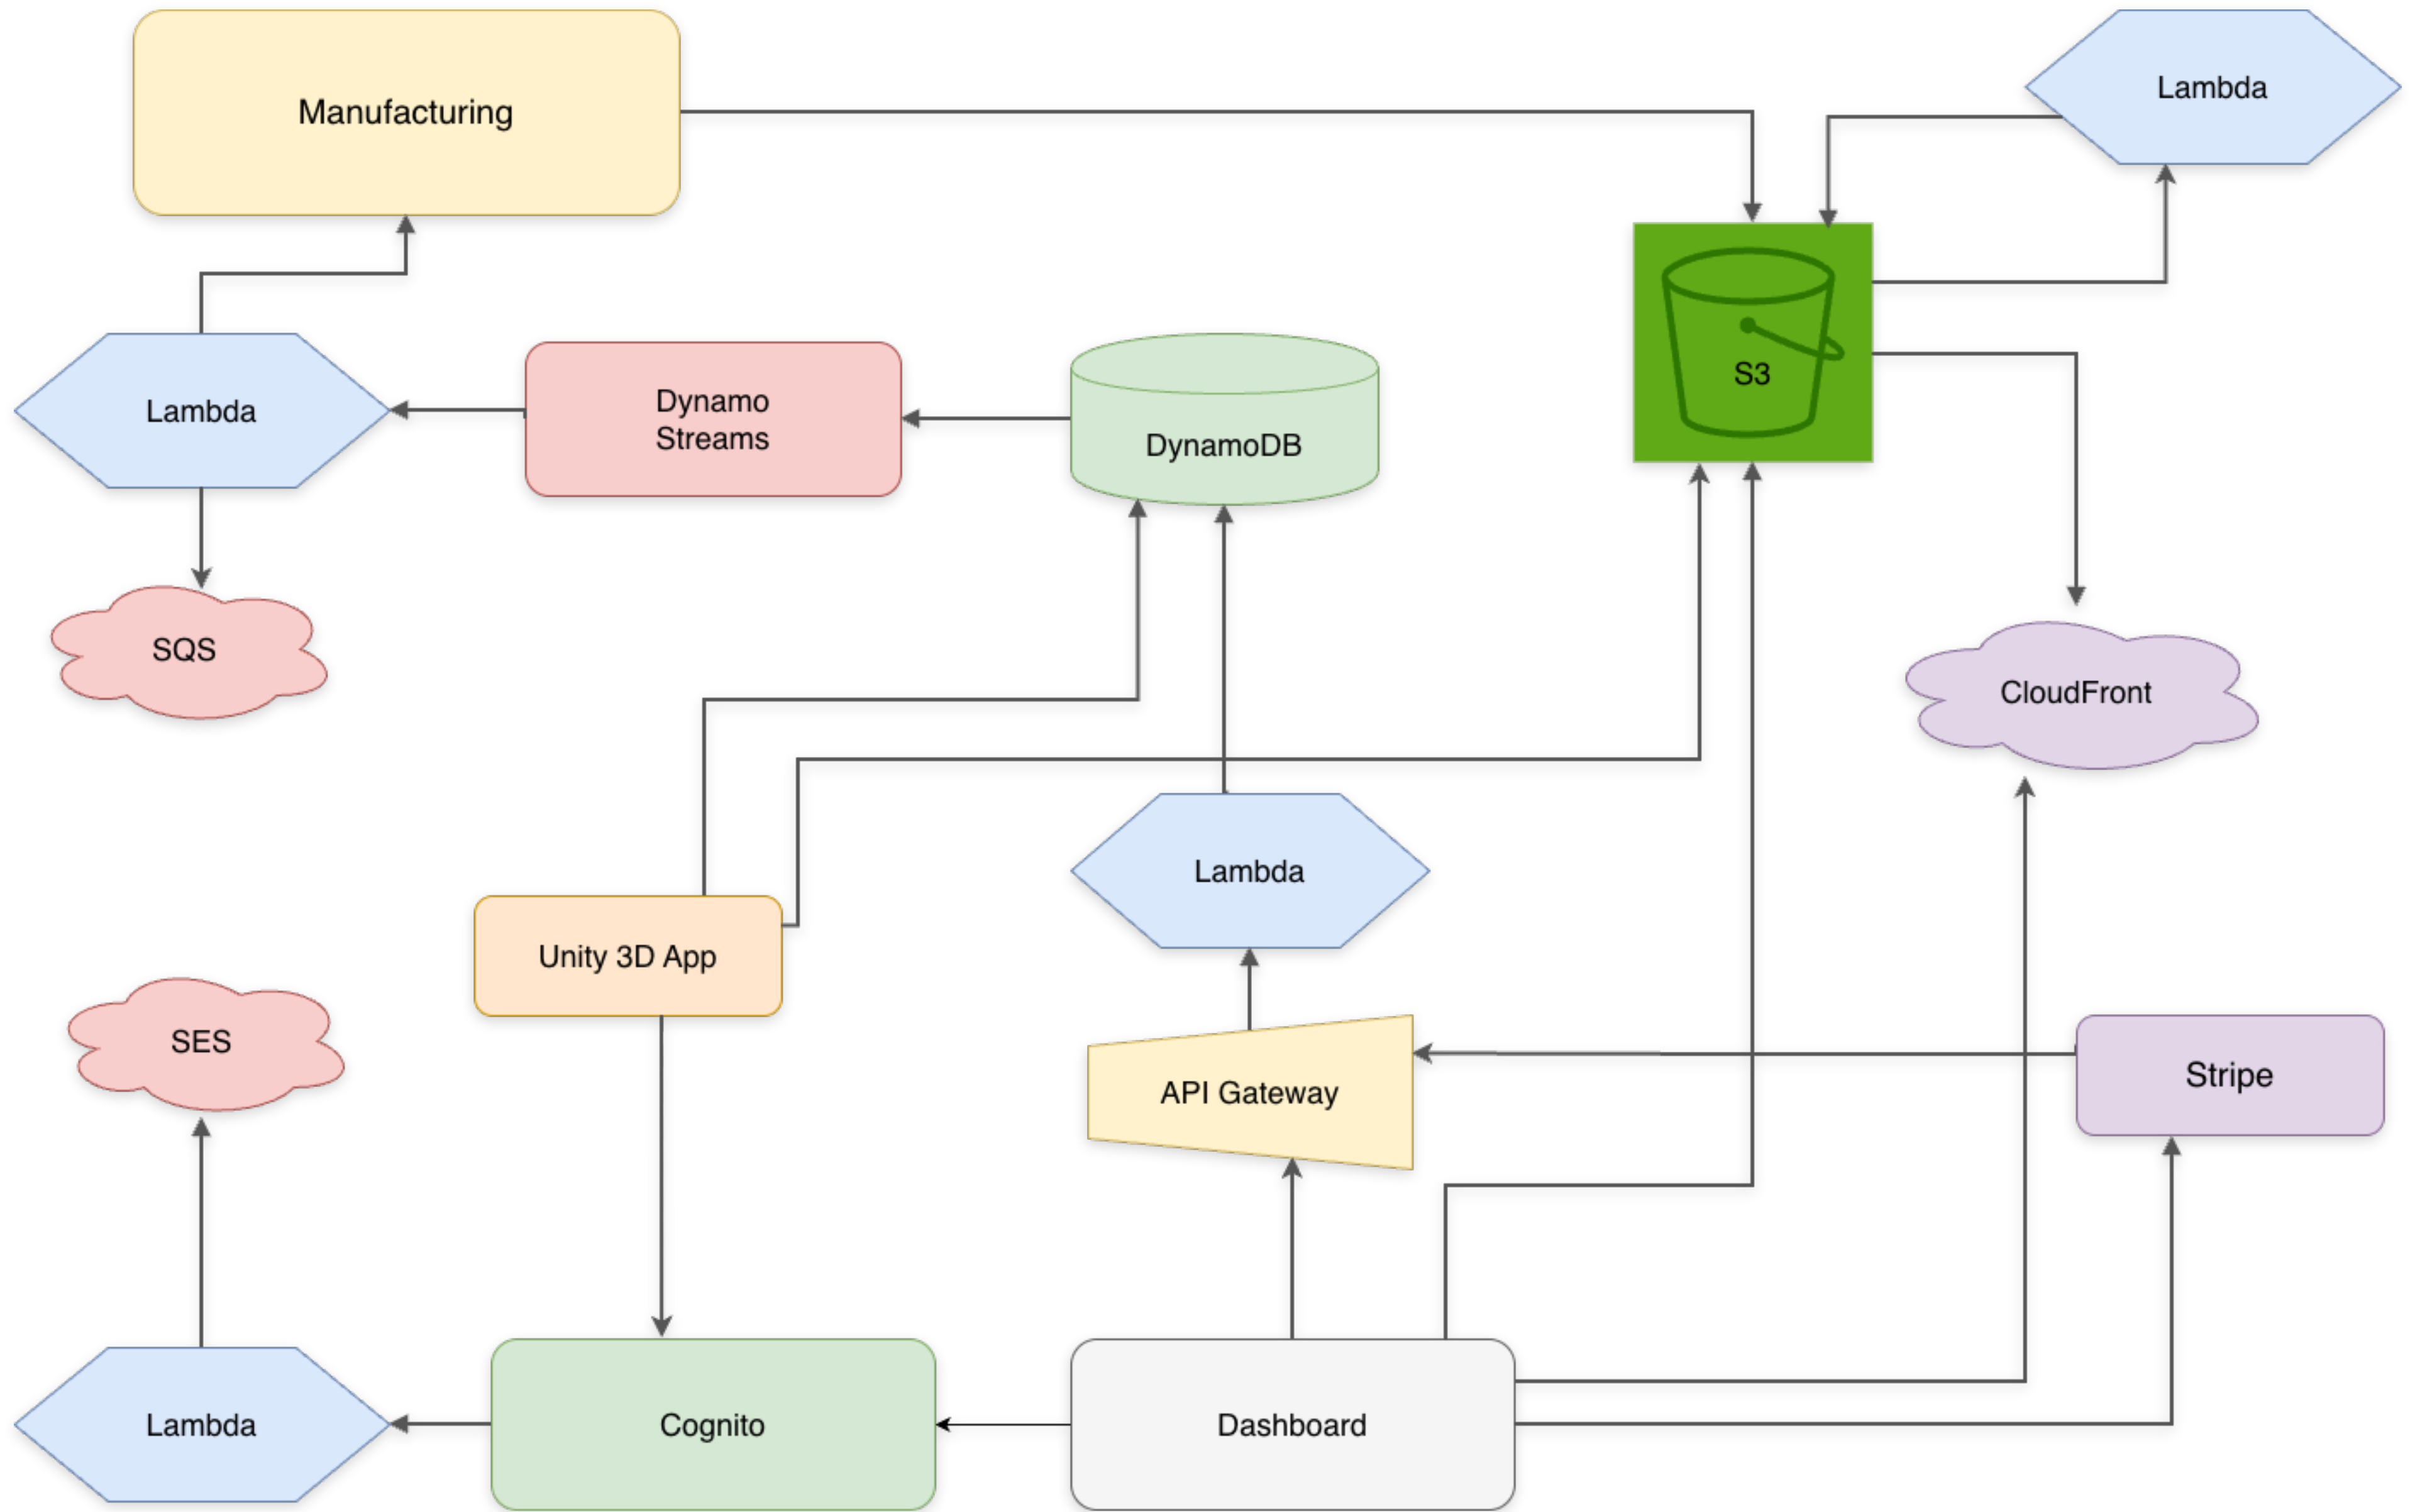

- Layers
- Grid
- IPR
- Cutouts & Hooks
- Overlay
- Collisions

Integrated WebGL treatment viewer

The case workflow includes an integrated WebGL-based treatment viewer for inspecting setup output directly from the dashboard.

Architecture

Serverless AWS architecture powering the ArchForm dashboard, manufacturing pipeline, payments, and 3D treatment workflow.
